engaged in urban
water work each year

Depave Calgary

2 community projects

80+ community
volunteers

3000 m2 depaved

"Thank you Green Calgary for taking on this work. If the [2013] floods taught us anything, it's that we need to be better prepared. We all want to do the right thing but we don't always know what that is. We trust Green Calgary to help us make the changes we need to make and to take the right sort of actions."
